# SUP KIDS PROGRAM

Jump on board...

When kids fall in  
love with an outdoor  
sport, they fall in  
love with the  
outdoors

Kids who love their planet become ambassadors for taking care of it.

#### SUP LESSON & TOUR

Get the kids out on the water in a safe environment for you to enjoy, move, laugh, get some Vitamin D and most importantly get the kids off the screens.

#### ECO - AWARENESS

Teaching kids how to lead a sustainable and eco-friendly lifestyle will learn them to take responsibility for their actions and maintain a healthier planet.

## OUR KIDS PROGRAM

Our Kids SUP program is designed to teach kids Stand Up Paddle Boarding, water safety & environmental education. We know what it's like to fall in love with being in the ocean. And we know that, with a passion for SUP comes a responsibility to take care of our environment. Our vision is to create experiences for our SUP Kids that will enhance their appreciation, respect & understanding for sustainable living.

We use games, drills & SUP activities to ensure that our SUP Kids walk away with vital water safety skills that will stay with them for life. We've taken environmental education out of the classroom, to the great outdoors, where we think it belongs.

[www.SUPkids.co](http://www.SUPkids.co)

In our Stand Up Paddle Board program kids will be given the opportunity to explore and experience a new world on the water via stand up paddling. Activities will include stand up paddle boarding lesson & tour, water games, eco-awareness, water safety, races, contests, and much more.
